There was a very buoyant market throughout the first coard. With more than the usual activity, an advance realised on nearly every stock sold. Indiana 5's tup % per cent; Missouri 6's X; Erie Bonds, 1875, ; Illinois Central Bonds, ¾; Nicaragua, ¼; Cumber and, %; New York Central Kailroad, 1%; Cleveland and clade, 1%; Michigan Southern 1; Erie, 1%; Reading, K; Michigan Central, %. Galena and Chicago sold to sextent of 47 shares at 110 per cent, dividend off; and faw shares of Milwauhte and dissinsippi sold at 82% per ant. Reading opened at 85 and ran up to 88 per cent, ader large purchases by a leading bear operator. His probases amounted to seven thousand four hundred area. All efforts made to depress this stock cannot but temporarily successful. We understand that the part of the English stockholders has invected every lilar about being received in cividends in the stock. a amount is said to be about two hundred and ty thousand dollars. He will also receive about one half of the total quantity of new stock to be issued ander the stock dividend, not one share of which will ome upon the market. The balance will be pretty well cattered and pretty generally held. The big bear was size in coming in to-day for a big lot. He might have set it considerably cheaper a few days ago. Eric touched to per cent at the first board, but tell off a fraction afterclous economy is now exercised in all the dements of expenditure, and the road is operated at a cent as reduced as any railroad company in the State, a its gross earnings are as large on its capital and as itable as any other. Tuere was a sale of Nicaragua asit to-day at 24 per cent, buyer sixty days, but lower of the first board it was reported in the street that he Senate was in secret session, and that the President and sent in a message relative to Central American affairs of a beiligerent character. This, for the moment, created some little exchement, but speculators are getused to these waruke rumers from Washington, and new pay very little attention to them. They have been so often humbugged by them, that the effect now is but

which closed firm at our quotations. A small let of Mil-saukie and Mississippi sold at 84 per cent, being an adrankle and Mississippi seta at ea per cent, done rance since morning of 1% per cent. After the board 4% per cent was bid and no stock offered. Michigan couthern sold at 89 per cent, buyer thirty days. The best offer for New York Central Railroad this afternoon was 98 per cent. For Galena and Chicago 109 bid, 110% asked, ex-dividend. Harlew, 16 per cent bid. Hudson Railroad, 27 bid. The market closed steady.

RETAIL PRICES OF PRODUCE AT THE WASHINGTON
MARKET.

Meat is still unchanged in price, high rates prevailing. though teef of all kinds is much more plenty than it was last week. The news of the high prices at this market has gone all over the country, and large quantities of meat is on its way to this city. The detention in travel has kept much of it back. Prices must come down before a great while. Veal has made its appearance, and prices are cownward; most of that in market is from Southern ports—from Baltimore, Norfolk and other place along the coast. It will soon be plentiful.

along the coast. It will soon be plentiful.

Peultry and game are comparatively scarce, and quite dear, though it is doubful whether they are not cheaper fer foed than meat. Our list was never so complete as at present.

Fish shows no change worth noting.

Fine winter apples are now every where seen in market, all tolerably sheap. Butter is still high, nor is there much prospect of its lowering before May. Eggs were never higher than at present, though the approach of spring must bring them down somewhat.

Vegetables are getting dearer as a general thing. Potatoes have advanced twenty-fire centes a barrel; cableges are a little chesper, tomatoes have disappeared; ce ery and other winter produce is abunitant and good, and paramips, onlons and turnips are cheap. Gross peas can be had for a shilling a quart. We notice little else new. We quote as follows:—

quantity that can be disposed of per month in California was in ended to be set down at 12,000 firkins, testead of pounds. As you take issue on the amount shipped to that sountry in 1855, you will allow me to say I derived my it for matter from exporters to that market, who re-affirm the statement. You ray 95,000 packages were transmitted to San Franch co in 1862. You will admit, no loub, the population has deuted since that time, and that but a small proportion of the amount consumed is manufactured there. You say it is estimated that there are 60,000 firkins in this market. I have taxen some pains to accertain from reliable sources, and those possessing the best means of knowing say they think the estimate to high by at least 10,000 firkins. There are not thirty merchants that average 1 000 each. The price was so high fat the fall the retail grocers beught but hith, preferring to wait until a lower price ruled the market value, and have all along supplied themselves daily or weekly. So with a large proportion of families. I mention that to show that nearly all the butter in market is held by commission houses and dealers in the south and west parts of the city. When the price of butter is low in the full farmers and dealers often hold large quantities back awaiting an alwance in prices. Not so wen prices rule high. Then all that to market. This being so, there's filled or none remaining in the country to find its way here. It is very different now, since the completion of our rulroads to what it was in farmer years. There are a great many to the country that obtain short loans from banks, purchase produce, bring it to market, and are compelled to sell to meet their notes; and as a consequence, men of means purchase and soil at eight and ten tenis sidvance on the pound, enabling them to keep fast hor-es, live high, and are surpruously every day.
